INTRODUCTION

Purpose of Act

2 The purpose of this Act is to support and promote the protection, enhancement and prudent use of the environment while recognizing the following goals:

- (a) maintaining environmental protection as essential to the integrity of ecosystems, human health and the socio-economic well-being of society;
- (b) maintaining the principles of sustainable development, including
 - (i) the principle of ecological value, ensuring the maintenance and restoration of essential ecological processes and the preservation and prevention of loss of biological diversity,
 - (ii) the precautionary principle will be used in decision-making so that where there are threats of serious or irreversible damage, the lack of full scientific certainty shall not be used as a reason for postponing measures to prevent environmental degradation,
 - (iii) the principle of pollution prevention and waste reduction as the foundation for long-term environmental protection, including
 - (A) the conservation and efficient use of resources,
 - (B) the promotion of the development and use of sustainable, scientific and technological innovations and management systems, and
 - (C) the importance of reducing, reusing, recycling and recovering the products of our society,
 - (iv) the principle of shared responsibility of all Nova Scotians to sustain the environment and the economy, both locally and globally, through individual and government actions,
 - (v) the stewardship principle, which recognizes the responsibility of a producer for a product from the point of manufacturing to the point of final disposal,
 - (vi) the linkage between economic and environmental issues, recognizing that long-term economic prosperity depends upon sound environmental management and that effective environmental protection depends on a strong economy, and
 - (vii) the comprehensive integration of sustainable development principles in public policy making in the Province;
- (c) the polluter-pay principle confirming the responsibility of anyone who creates an adverse effect on the environment that is not *de minimis* to take remedial action and pay for the costs of that action;
- (d) taking remedial action and providing for rehabilitation to restore an adversely affected area to a beneficial use;
- (e) Government having a catalyst role in the areas of environmental education, environmental management, environmental emergencies, environmental research and the development of policies, standards, objectives and guidelines and other measures to protect the environment;

- (f) encouraging the development and use of environmental technologies, innovations and industries;
- (g) the Province being responsible for working co-operatively and building partnerships with other provinces, the Government of Canada, other governments and other persons respecting transboundary matters and the co-ordination of legislative and regulatory initiatives;
- (h) providing access to information and facilitating effective public participation in the formulation of decisions affecting the environment, including opportunities to participate in the review of legislation, regulations and policies and the provision of access to information affecting the environment;
- (i) providing a responsive, effective, fair, timely and efficient administrative and regulatory system;
- (j) promoting this Act primarily through non-regulatory means such as co-operation, communication, education, incentives and partnerships. 1994-95, c. 1, s. 2; 2006, c. 30, s. 1; 2011, c. 61, s. 1.

(7) Where an order to pay is issued by the Minister pursuant to subsection (3), the order may be filed with the prothonotary of the Supreme Court and recorded in the environmental registry and, when so filed and recorded,

(a) the order is of the same force and effect as if it were a judgment against real property that the person named in the order may now or hereafter own;
