"On behalf of the government and

forward in initiating a competition in
the Regina Public schools among the
pupils of Grade VII and VIII. The
competition will be closed by an essay
on fire prevention and to the three
first essays will be attached three
prizes, a gold medal for first, a silver
medal for second and a bronze medal
for third. The gold medal has already
been donated by E. B. Stevens, of Can-

street railway systems the amendment
was brought down. The present Rail-
way act is clear that such systems
must be of the two-man type, that is
a motorman and conductor to each
car. Some of the cities were anxious
that they should be at liberty to op-
erate a one-man system. The gov-
ernment, he continued, was not com-
mitted to the proposal in any way.
The amendment provides that any
city having a street car system may
use the one-man system providing the
citizens, the majority of them, give
their consent by way of a referendum.
"It is my desire to have the bill re-
ferred to the committee on private
bills and railways" said Mr. Dunning.
"In order that all interests may have
an opportunity of putting their views
forward. Some have signified dis-
approval of the one-man system and
it is in order that all views may be
presented that this action has been
taken."

The bill was read a second time and
referred to the committee on private
bills and railways.
