Subject: Bill 84 - NSAC merger with Dalhousie

To Whom It May Concern:

I would like to state my disappointment with Bill 84 - NSAC merger with Dalhousie University. There were certain employee rights and benefits that were promised throughout the negotiation process that are not included in Bill 84.

I am not opposed to the Dal merger but I am opposed to losing certain employee rights and benefits that we deserve to maintain as we dissolve from being a civil service employee.

I am disappointed that the Bill 84 was introduced so quickly and has the potential to pass through the legislature without the careful review and protection of the rights of the employees of NSAC.

As an alumnus of NSAC, current employee and a resident of Truro who plans to continue raise their young family in Truro for the remainder of their career, I hereby request that Bill 84 be delayed in being past until there is a careful review and amendments brought forward to its contents to ensure that the rights and benefits of the current employees are protected and not lost.

Although I would be unable to speak to this matter on Friday, I still wanted to make sure that my voice was heard for the concerns of myself and fellow employees.

I thank you for your time and consideration in this matter.

Regards,
Sara Murphy
