Subject: vaping flavors

I'm letting you all know I do not in any way agree on the decision on getting rid of flavor juice it is in no way targeting students or minors its to help people who smoke quit. Its time we start getting the respect we deserve and keep what we enjoy in life instead of the government taking away all the time consider everyone one else decision as well. I contacted many place of which sells the e vapors and they do not sell to minors , and no minors have even tried to purchase e juice or vapor products.
