Subject: concerns as a teacher

Law Amendments Committee,

I am writing my concerns since I am unable to attend the march on the Legislature today. This is because my day does not end after classes are dismissed. I have two meetings after school which involve reviewing a psychological assessment report on a student and the second to do with programming for Learning Disabled students.

I am a teacher of twenty two years with Chignecto Central and I want to voice my concerns. It is imperative to understand the negative impact government cutbacks have had on the classroom. It is so important to listen to teachers when designing education policy. Teachers are educating our future generation and need to be heard and respected.

Thank you,
Kathleen Roy
