The teachers and the students are suffering. You have people in your legislature that have not taught. You and your government speak a certain way from a financial basis. Tonight i have heard crap. I understand the financial aspect but my students and my staff have been suffering for many years. What have we done for our province, how smart are our children going to be with no drive. What kind of competition are we going to have? Our government is talking bleep bleep. You take away failing, you take away being marked for assignments, put all of our students together and try to be a super human, teach every student. That is the demand. It is unreal. The majority of this province I am sure has issue with this. Stop telling stories. Allow your members to say what they want.
