Subject: Bill 75

To Whom this May Concern:

This Bill is a gross interference with free collective bargaining, is contrary to fundamental Canadian values, and effectively removes the right to strike from members of the NSTU's Public School Bargaining Unit.

Instead of passing this bill you need to support all teachers, parents and students of Nova Scotia and demand that real change happens instead of passing a bill that does not support any of the above. Data Entry, assessments, meetings and non-support for inclusive education are stretching all our teachers new and experienced to a point of burn out. To continue to deliver quality education to ALL students the above issues need to be addressed now!
