Good day,

In regards to Bill No. 145.

In an instance where a customer is in the process of having their renewable generator system that is less than 27 kW approved by NSP. If the legislation comes into effect before the system is approved. Do they fall under the new legislation or do they still need to wait for NSP approval and be subject to the terms and conditions prior to this new legislation?

Any information will be helpful, thank you.
