

Dear Legislators,

I am writing to you to urge you to support the passage of Clause 33 in Bill 127. The harm that has come to individuals and families by medical professionals being unable to share critical information about a client, can be mitigated. You will rarely have the opportunity to make such a specific, direct, and life-changing vote as this one, in your legislative careers. Please allow families to help their loved ones in a time of crisis.

Thank you,

Sincerely,

Frances Dorsey
